

# MUNGU PROJECT

*Posted on June 9, 2022 by Steppe Gold Limited*

Category: [Public listed companies](#)

The Mungu gold and silver discovery is located immediately northeast of the current resource at the ATO Project. It is a structurally controlled epithermal gold-silver system with localized bonanza grades. The high-grade gold-silver mineralization in the northern part of ATO Pipe #4 has been interpreted by Steppe Gold to have a steeply westward dipping structural control with a similar northeast strike projecting toward and possibly joining the Mungu zone of mineralization.

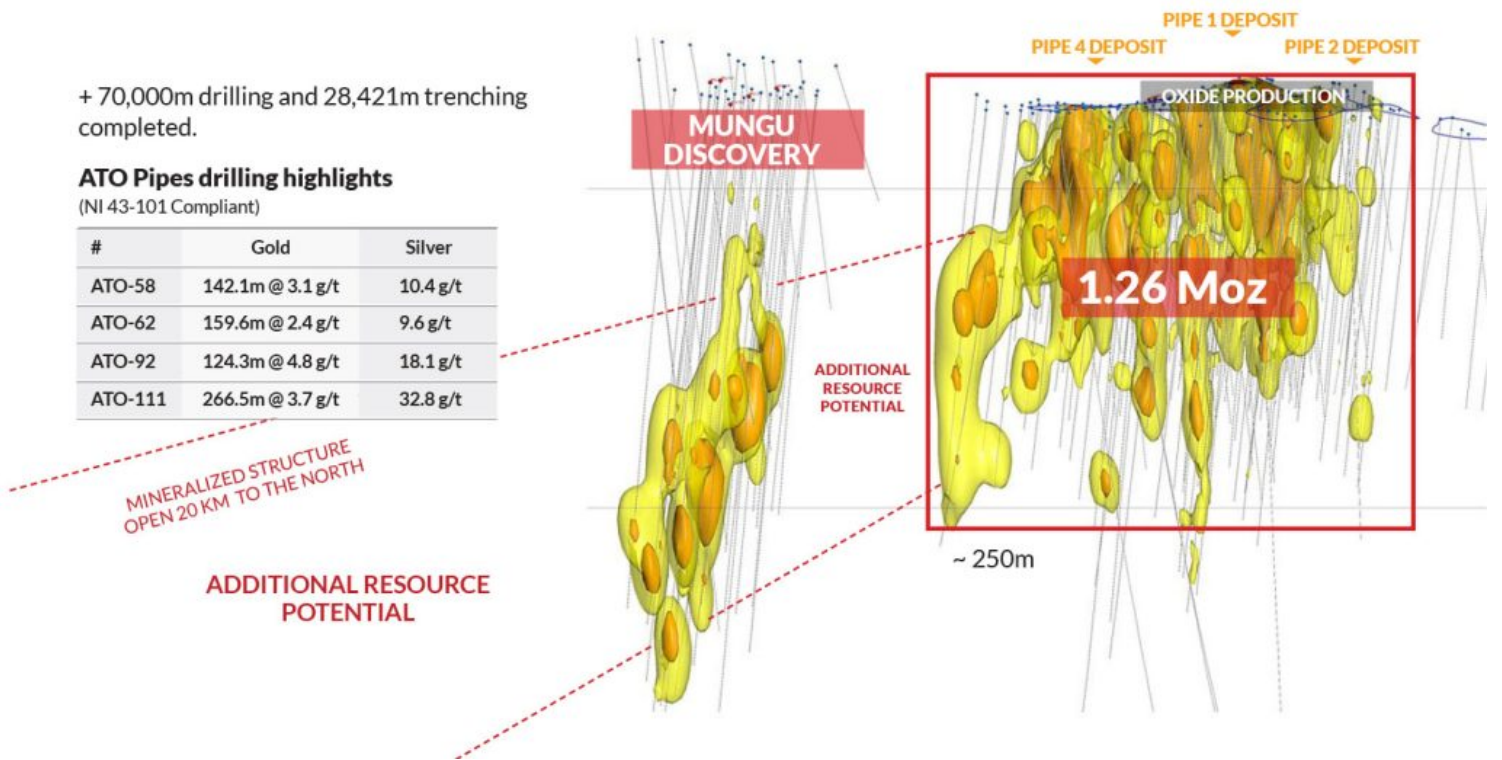

## EXPLORATION AND DEVELOPMENT

+ 70,000m drilling and 28,421m trenching completed.

**ATO Pipes drilling highlights**

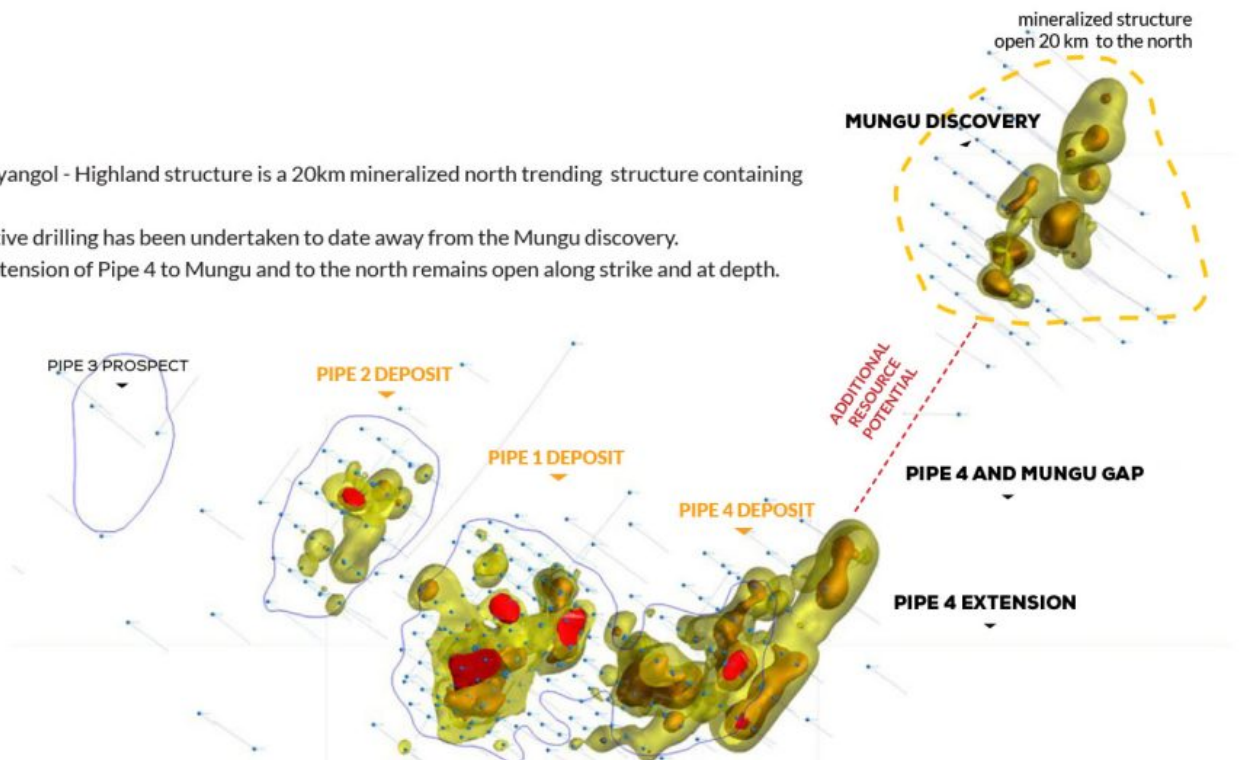

(NI 43-101 Compliant)

#	Gold	Silver
ATO-58	142.1m @ 3.1 g/t	10.4 g/t
ATO-62	159.6m @ 2.4 g/t	9.6 g/t
ATO-92	124.3m @ 4.8 g/t	18.1 g/t
ATO-111	266.5m @ 3.7 g/t	32.8 g/t

# MUNGU GOLD-SILVER DISCOVERY

- The Mungu - Bayangol - Highland structure is a 20km mineralized north trending structure containing gold and silver.
- Very little effective drilling has been undertaken to date away from the Mungu discovery.
- The northern extension of Pipe 4 to Mungu and to the north remains open along strike and at depth.

## STAGE 2 DRILLING

## HIGHLIGHTS

- First visible gold seen at ATO with super high grades being returned;

Visible gold in drill core from ATO-299

ATO4 - Mungu Trend at completion of the Stage 2 drilling program - Gold & Silver mineralization
